DRIPPING SPRINGS ELIVATES ITS ATHLETIC PROGRAM WITH HELP FROM TEXAS SPORTS BUILDERS

Dallas, Texas-June 17, 2011-Dripping Springs commissions Texas Sports Builders to construct and install its second and third full sized synthetic turf fields in the district.

Contracted with American Constructors, bringing twenty-five years of the best client service possible, Texas Sports Builders was able to build the state of the art multi-field and track facility at the new Dripping Springs High School.

The new state-of-the-art track consists of a brand new eight lane competition running track with a "Prefer' RC" Polyurethane Structural Spray. This procedure consists of a high performance PU base mat and a two layer structural spray to create an exceptional multi-purpose track surface to be used at all levels of the sport. The structural spray system provides a textured slip resistant all-weather running surface which allows athletes to perform safely and at the highest level.

The track is not the only shining star at Dripping Springs High School athletic facility. Texas Sports Builders monofilament synthetic turf field installed inside the track oval truly enhances the athletic versatility of the facility. This acts as the work horse field for the district, providing a practice and competition facility for all the high schools athletic and fine arts events.

Just located on the North West side of the high school you can find an additional multi-sport competition athletic field. This will allow other Dripping Springs High School programs to experience the best of the best in synthetic turf.

The Dripping Springs ISD project has marked the sixth synthetic turf and track installation in the Austin area for Texas Sports Builders. With heavy competition deeply rooted in the area, this goes to show that Texas Sports Builders is running with the big dogs in the industry.

About Texas Sports Builders

Texas Sports Builders is the leading sports construction company in the Southwest region with over twenty years of experience under their belt. TSB is operated by Chuck Wheeler, over thirty years of construction experience, and Hector Puentes, one of only a few in the country with a designation of both **Certified Track Builder** and **Certified Field Builder** from the American Sports Builders Association.
